

4-SONG \$300 DEMO DEAL

What is it?

The 4-Song Demo Deal is a highly affordable production package that meets an important need for bands and artists - a good demo at a price that almost anyone can afford.

What do we get with this package?

1. An experienced, efficient engineer capable of delivering top-notch results
2. 10 hours in Studio A - our best and most gear-loaded studio
3. 4 songs completed on a CD at the session's end, mixed and ready for sharing and promoting your music

What's the catch?

There isn't a catch, but there are a few stipulations and details you should know about.

The goal with this package is NOT to start a long-term production such as an album, but to complete a good-sounding demo disc with a maximum of 4 songs that can be used to promote your band. Although the deal includes mixing, it only includes a quick mastering job designed to get the tracks to CD and at acceptable "loudness" levels. If for some reason you decide that you want additionally refined mixing and mastering services for these recordings, you will certainly have the option to purchase them at typical rates.

Recording and mixing 4 songs in 10 hours is challenging from a performance and engineering perspective. It takes an especially organized and efficient approach from both the artist and the engineer to get the most from the session time. Know your songs, know the strengths and weaknesses of the parts and players and make sure your instruments are ready to record (fresh strings and heads, etc). 4 songs are not required for the package and actually most bands will only do 3 - which allows more time to get better sounds!

Please keep in mind that this demo package must be booked in 10 consecutive hours on one day and does require a 50% deposit.

If you have any further questions contact one of our engineers today!
